

PDF reader acceptance sample

This five-page file tests the reader without using copyrighted manuals. It has selectable text, an outline, a table, links and an image-only page. Use it in Single, Continuous and Two-page Spread layouts.

CHECKPOINTS

- 01 Find QA-ANCHOR-BRAVO on page 2.
- 02 Test portrait and landscape pages without stretching.
- 03 Turn the last spread without requesting a nonexistent page.
- 04 Open the same document in two independent panes.
- 05 Confirm the image-only page does not pretend to contain selectable text.

Selectable text and language pairs

QA-ANCHOR-BRAVO

Select this sentence and copy it from the real PDF text layer.

A screenshot-only viewer cannot pass that acceptance test.

Norwegian / English sample

Jeg vil lese to sider samtidig.

I want to read two pages at the same time.

Snippet display sample - not executable

```
SELECT item_id, category
FROM example_items
ORDER BY item_id;
```

Landscape table

Item	Category	Quantity	Comment
A01	Sample A	3	Synthetic row for viewing
A02	Sample A	5	No real business data
B01	Sample B	2	Table should remain readable
B02	Sample B	8	Test fit-width and zoom

QA-ANCHOR-TABLE: content remains readable after resize.

Links, page state and notes

QA-ANCHOR-DELTA

Open this file in both panes: leave one on page 2 and one on page 4.
Changing the active pane must not overwrite the other page position.
A remark should store document ID, physical page and byte revision.

External link test

example.org - open only after a deliberate click

IMAGE-ONLY TEST PAGE

This page contains a raster image only.

The reader should not claim selectable text.

OCR is not included in v1.1.

The final spread must handle page 5 correctly.

SYNTHETIC SCAN / NO PRIVATE DATA
